EOS Ambulance

Manufacture of vehicles with special equipment

Our company, which was established in 2011 for the manufacture of vehicle superstructures, has accomplished many successful works during the time period. Since 2016, it has specialized in the production of ambulances and mobile health vehicles by directing its expertise in vehicle superstructure manufacturing to a specific product. Since 2019, we have decided to carry the experiences we have gained on ambulances and mobile health vehicles in the country to foreign markets.

Various vehicle superstructures (fire engine, vacuum truck, garbage truck, etc.) are still manufactured and sold in other group companies of our company. EOS Ambulance company has started to manufacture and sell ambulances and mobile health vehicles since 2018.

In addition to customer requests and project-based work, our company manufactures and sell the following product groups as standard.

“ We felt the need to professionalize our experience in the production of special equipment vehicles on ambulances and mobile health vehicles.

With this in mind, we created the EOS ambulance brand. We continue to work to offer our valued customers the best quality at the most affordable cost.
